# Hybrid and Remote Learning scenarios

Times are changing. As Schools transition to remote and hybrid learning environments, the right tools can help you continue to support the wellbeing of your students even while they're not within the classroom.

## Devices for learning

Promote anytime, any place work environments with [Microsoft devices for Education](#).

### Meet virtually using Teams

The easiest way to stay in communication with students and educators is through Teams. You can create teams for classes or for groups of educators. Teams lets you chat, post messages and files, and video chat from any device

### Share content with students

Teams goes beyond group communication—you can keep all your class files there, too. Each team you create store conversations, files, and collaboration in one place. You and your students can access them anywhere by simply going to [teams.microsoft.com](https://teams.microsoft.com).

### Assign work

Your class handouts, quizzes, tests, and homework can all be assigned and even graded online. Make an assignment as simple or complex as you need. Assign files and quizzes directly within Teams that students can work on and turn in, without needing to leave the app.

### Keep students engaged

Remote learning is anything but dull! Transform your virtual classroom with lots more creative, interactive, and inclusive ideas. Check out the ideas below, or browse the [Microsoft Educator Center](#) for more.

Cortana

Windows 10

# Digitalization

From device to digitalization

Level	Focus	Outcomes
<b>Digitalization (DIGI)</b> <i>Artificial intelligence</i>	<ul style="list-style-type: none"><li>-Systemic change (system thinking)</li><li>-Operational culture</li><li>-Leadership</li></ul>	<i>Enabling new processes, that create added value</i> → Enabling totally new functions and activities
<b>Information technology (IT)</b>	<ul style="list-style-type: none"><li>-Computational information processing (computing)</li><li>-Processes</li><li>-Automation</li></ul>	<i>Automation of processes and information processing</i> → Making existing functions and activities more effective
<b>Computers and technical devices (Hard ware, devices)</b> <i>Digital plumbing</i>	<ul style="list-style-type: none"><li>-Hard ware, devices</li><li>-Procurements</li></ul>	<i>“Pressing buttons”, usually just manual information processing (vs electric typewriter)</i> → Using another tool for existing functions and activities

A woman with glasses and a young child are looking at a tablet together. The woman is pointing at the screen, and the child is looking intently. The background is a blurred office or classroom setting with a grid pattern.

Digitalization in education is a  
**process of change**,  
where technology is used to enable  
**new pedagogical processes** and  
methods.
